

AI-POWERED PRODUCT LEADERSHIP

The MACH-10 PM

AI-Powered Product Management at Hypersonic Speed

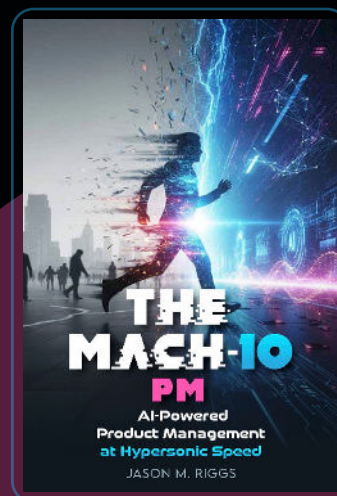

By Jason M. Riggs

A field manual for AI-era product leaders. It turns speed, judgment, and AI leverage into an operating model for teams that need to move faster without creating chaos.

POSITIONING

Built for teams where AI has collapsed the old product clock.

The MACH-10 PM gives leaders a usable system for faster discovery, sharper decisions, cleaner execution, and better alignment when traditional product cycles no longer keep up.

INSIDE THE BOOK

- **Decision velocity**
Use AI to compress insight-to-action cycles.
- **Operating models**
Turn prompts, workflows, and intelligence loops into repeatable systems.
- **Speed with Soul**
Move faster without replacing judgment, ethics, or purpose.

INTERVIEW ANGLES

- **The new definition of speed**
What speed means when AI changes the operating tempo.
- **Leadership in the AI era**
Why leaders must become translators of human and machine judgment.
- **When AI adoption goes wrong**
How teams avoid automating noise instead of improving outcomes.

PROOF POINTS

Award-winning framework. Recognized through independent editorial praise and industry-facing press coverage.
